Photoshop CS2 allows you to add various effects, modify text, and adjust images and colors. As with any photo-editing program, Photoshop comes with some built-in advice. Sometimes, though, that advice is wrong. For example, Photoshop tells you to reshape images with the Resize tool (it's in the Edit menu on the tool bar), even though Reshape actually does much more. This book explains the features of the programs and tools that you may find useful in your photo retouching. Retouching Your Pictures The Retouch feature gives you access to lots of powerful tools that, when used in combination, can give you some of the best results possible for editing your images. The Retouch feature is available in the Edit menu, and you can find it under

Retouch ► Retouch. The Retouch commands also appear in the Status bar, as shown in Figure 2-1. FIGURE 2-1: All the Retouch commands appear in the status bar. The Retouch options in Photoshop's context menu includes more retouching and editing options than you may know. See the following list for an overview of the Retouch tools: Distort: Rotates, skews, stretches, or contracts the image area. It works in the same way that you can stretch an image in an image-editing program such as PaintShop Pro. Use this option when you want to make the image wider or narrower. To rotate, simply drag and drag. To skew, drag and drag, or press Ctrl+T. To stretch in a specific direction, align the guides on the right or left side of the image, use the Zoom tool, and drag. You can even do a combination of all the options. Adjust Exposure, Levels, and Color: This menu lets you make adjustments to the image's color, lighten or darken, increase or decrease the light intensity, or adjust the settings for exposure, levels, and color. If you don't know how to use the tools in the Adjust Exposure section, take a look at the previous section, "Discovering the Command-letter Menus." Blur: This tool allows you to blur the edges of the image area. This option works by blurring a section of an image, using a radial blur. You can blur in multiple directions or just a single direction. To use a radial blur, drag around the image area, as

Related Links WAKE FOREST, NC - The Wake Forest Community College Center for Diversity and Social Justice (Diversity Center) hosted a forum yesterday on campus to discuss the challenges facing young Black people today. "Forty Million Dollars Still Not Enough to Protect Education's Future" was the topic of the forum, which was held in the Art Gallery at the new Administration Building. Speakers included high school seniors Sydney Chivaris and Nia Seiuli. Chivaris is a junior at NC Central High School in Durham. Seiuli is a junior at Fuquay-Varina High School in Wake Forest. Both students have faced significant challenges in their education, said Chuck Jones, the Diversity Center director. Chivaris identified positive changes in her high school, such as more support for teachers and fewer suspensions and expulsions. Seiuli, meanwhile, listed poverty, police harassment and the lack of job opportunities as reasons why some students still do not complete their education. A DNA segment containing the mouse Kip1 locus regulates the size of the small polytene nucleus. The inheritance of polytene nucleus size was analyzed in a series of polytene chromosomes of the *Drosophila melanogaster* subgroup of species. From two different species in the group, *D. helena* and *D. virilis*, six combinations of crosses were constructed, and in each combination, the male parent differed in either the presence or absence of a given chromosome carrying a DNA fragment with the mouse Kip1 locus. The results showed that in the inversion containing Kip1, the size of the polytene nucleus in the oocyte was reduced, whether or not the dosage of Kip1 is the same as that of the homologous chromosome in the wild type. These results indicate that in the inversion containing Kip1, the locus is a suppressor of polyteny. This is consistent with the fact that the polyteny is induced when *Drosophila* species are transformed with a DNA segment containing the mouse Kip1 locus. 3D Printing News and Innovation AUSTIN, TX (PRWEB) APRIL 22, 2015 Toy is made for everyone. Q: Understanding the critical points of a function: $x^4 + y^4 = 8$ I need to find the critical points of the following function: $f(x,y) = x^4 + y^4 - 8$ I've already figured out that the solution will be the points $(-2,0)$, $(2,0)$, $(0,-2)$, and $(0,2)$ but I'm not sure of the method. I'm not even sure how the method of solving the problem will be. Does anyone know of a website or book on how to solve this problem and get the 4 points of the critical points of the function? A: If you're familiar with the Lagrange multipliers, you should be able to use that to solve the problem. The normal method would be to set $\frac{\partial f}{\partial x} = \frac{\partial f}{\partial y} = 0$. This gives you a system of equations where you have to solve for the four values of x and y that minimize $x^4 + y^4$. the German language. The current german studies curriculum in Switzerland is a concoction of several organizations. The lack of regard for the Dutch language has been a factor in the almost complete lack of interest for german studies in the Netherlands. Don't know about Switzerland, but in Germany the study of the German language is part of the state funded bildungswesen, which means that the government is paying for it. Schools are required to teach it in the same manner as the study of math or a foreign language, so it is part of the framework of public education. Yes there are the PRT and all the other programmes on the German language and culture that are funded by the government. I'm not so sure about the romanisation system, but I guess it needs to be changed. It is no surprise that this (the German) language requires a good command of the spoken language. Learning the language certainly makes life easier but it does not compensate for having to be constantly reminded that it is a "foreign" language. There was a situation where a friend of mine was expecting a baby and was living in a large city in the German empire. His spouse was German, his other friends were from all over the world and at times it was really difficult to communicate with each other
