Christianity and Suicide What is the Christian view of suicide? In this book, I will discuss the many different views which Christian theology has of suicide and suicide attempts. The main focus will be suicide and the link that Christians make between suicide and sin. What do Christians believe about suicide? I believe that suicide is wrong because God made us all, as a whole person, and as long as we are a whole person we are made in God's image and so there is something sacred about each person. Because we have been created by God, we are in a special relationship with God. Our body is made up of many different organs and they are all God's creation. Although we can think of certain organs as man made as for example our eyes or heart, the other organs are God's work. As a whole person we are a creation of God and so each individual person, such as yourself, has something sacred about them. If we were to destroy the whole body, we would destroy the soul of that person. Therefore the soul or mind of a person is also God's creation. Since it is a creation of God, it has a certain dignity about it. Why is the dignity of the soul so important
