What's New In AutoCAD?

Designers can quickly import a paper-based drawing into a model that's shared with colleagues and clients. AutoCAD generates the drawing layout based on your current settings. Designers can import the paper-based drawing directly into a model in a number of ways, using predefined or custom layouts. Designers can also create and use their own layouts. With the new Markup Import feature, you can apply text, shapes, and annotations directly to a model. AutoCAD 2023 includes a new Markup Assistant to help designers quickly capture and add text, shapes, and annotations to a model. Designers can embed them into a model to create a workable drawing. The Markup Assist window offers a visual guide to help designers easily add text, shapes, and annotations to a model. (video: 1:40 min.) Mobile app: The mobile app now provides an easy way to collaborate on a model when using mobile devices. Designers can send and view their files from their mobile devices to other users and clients, or even other mobile devices on their own network. When the mobile app is used on mobile devices, it replaces the Ribbon on the mobile screen. The mobile app also simplifies drawing operations. The mobile app now supports 2-D drafting, using the full power of AutoCAD. Handwritten Content: Add handwritten content to your drawings, including signatures and notes. (video: 3:10 min.) You can annotate drawings created in earlier releases of AutoCAD, as well as in other programs, such as Autodesk Fusion 360 and Microsoft Excel. Annotate drawings with text, shapes, and images, which can be used as signatures, memos, or notes in your designs. Handwritten content can be freely added to any layer in a drawing, including: A layer for the main model. A layer to store annotations. An optional layer for annotations. An optional layer for handwritten content. Save time by using AutoCAD as a notebook, with the ability to open and close drawings and annotate them as
