Release history AutoCAD Version 13 was released in April 2012. Since then, the last two major releases, AutoCAD 2014 and AutoCAD 2015, have been released in September 2013 and April 2014, respectively. Support for the last AutoCAD version to support Windows XP ended in 2016. AutoCAD 2016 and newer versions support 64-bit operating systems. AutoCAD 2018 was the first release of AutoCAD that used version numbering consistent with the Windows version numbers. The earlier versions had used their own version numbering, but with each major release, AutoCAD's version number was incremented by 100. AutoCAD 2018 was version number 2017, as it supported the use of 32-bit applications with Windows Vista or Windows 7. AutoCAD 2009 was the last release of AutoCAD to use the old application format, and the first to use the now standard 64-bit based architecture, so it was the last release to be both able to run as an upgrade and also to support 32-bit applications on a 64-bit operating system. AutoCAD LT was released in March 2015. AutoCAD LT is designed for small business users, with an estimated 10 percent of the market. The main differences between LT and AutoCAD are that LT is smaller in footprint and can be run from a thumb drive. LT does not have a web-based configuration or model browsing tool, but it does provide a capability to publish drawings from desktop as web services. AutoCAD LT 16 was released in August 2016. AutoCAD LT 16 is the first AutoCAD version to support 64-bit native operating systems. It is also the first to support not only 32-bit native operating systems, but also newer operating systems such as Windows 8.x, Windows 10 and Windows Server 2012. AutoCAD LT 2009 was the last release of AutoCAD LT to support Windows XP. The Windows XP support in AutoCAD LT 2009 was done via an emulation layer, and the AutoCAD LT 2009 was the last release of AutoCAD LT to support 32-bit native operating systems. Version history As part of the release process, the software will be stamped with a specific version number. For example, AutoCAD 2009 was version number 3053, and the last version to support 32-bit native operating systems was version number 3053.
