Windows 77a5ca646e

Bing XML Sitemap Plugin creates a sitemap in the XML format, which is generated from the existing XML configuration of the hosted website. The sitemap is displayed at the root folder of the website, and at the URL. All of the sitemap elements are stored in the file system of the hosting account, and are kept up-to-date automatically. Moreover, Bing XML Sitemap Plugin is able to generate and update the sitemap automatically on the basis of the changes in the website's XML configuration. Sitemap elements that are added by Bing XML Sitemap Plugin will be placed in the sitemap in the root folder of the website, for example, , , and . The scope of the Sitemap's XML elements is the entire folder, not a specific page. What's new in version 3.0.9: - Additional information about the XML sitemap generation is presented at the output of the plugin. - The parsing of the generated XML sitemap has been improved. - The sitemap is generated only if the configuration in the database and in the configuration file is correct. - The configuration of the plugin's variables is accessible at the API's, which is another way of customizing the plugin. - Compatible with Linux and Windows. - The sitemap is generated only once every 24 hours. Please visit and see if the output looks like this: 2010-08-21T16:47:59.270+03:00 0.1 daily 0.1 2010-08-21T16:47:59.270+03:00 0.

What's New in the?
