Stardock Fences V3.0.3 Patch for PC is the latest version of Fences, Stardock's virtual protection application. Stardock Fences has gotten itself a major upgrade by making this version similar to the Pro version. This means users can now use Premium features on both their personal and work computers. The Premium features include.... Features: Password Protection: Provides better password protection by locking each app with a unique password. Passwordless: Password is needed only once and then is never needed again Limit User Access: Covers each software and hardware components and prevents non-license users from accessing the software. Application Firewall: Also known as Virus Wall. Prevents application vulnerabilities and hackers from infecting the software. Wildcard Characters: You can allow some special characters to work in passwords and not only numbers and letters. Find and Replace: Allows you to locate and replace words or characters in the software. Password Analyser: View and analyse the information on generated passwords. Protect with Email: email addresses can be saved to your account for easy access to all your software Mobile: Switch between multiple apps without leaving the mobile device. Monitor Time: Keeps track of the computer usage time. Tether: You can tether the device to your laptop to allow internet access. Interactivity: If your computer detects a virus, the software will not be able to access internet while the virus is on the device. Startup: List of most used and commonly accessed programs is shown on the start up screen. Includes: Just the core features are included without any premium or license.
