Features: Import models from DWF files Modify models directly in DWF files Extract specific information from models Create a new model or imported model Create an assembly from models Save projects from DWF files Import assemblies from assemblies SimLab DWF Importer for PTC SimLab DWF Importer for PTC is a useful and reliable plugin worth having when you need to quickly and easily import DWF files, projects and sessions inside Creo, then edit them. After the installation process is finished, you will notice that a new ribbon menu will be created, from where you can import your models and assemblies. SimLab DWF Importer for PTC Description: SimLab DWF Importer for PTC will be very helpful and useful when you need to import models or assemblies from DWF files. You can also do some modifications directly in DWF files, such as creating objects on a floor, adding images inside a wall, adding doors, windows, windows, adding manual text on parts of your models, extracting specific information,... and you can do all of this very quickly and simply using only the mouse. Features: Import models from DWF files Modify models directly in DWF files Extract specific information from models Create a new model or imported model Create an assembly from models Save projects from DWF files Import assemblies from assemblies Calculate dimensions from margins or rulers Import and save BIM files from SketchUp and other CAD applications (Import DWF in SketchUp and other CAD applications) Import and create objects from CAD files Import and create elements from other files File formats: DWF, DXF, DGN, ACIS, PDF, IFC System Requirements: Windows 10 and above Creo Connection 3.0 or above Creo Connection for Windows or Eonas Creo Connection for Android or BIM

What's New In SimLab DWF Importer For PTC?

SimLab DWF Importer for PTC (simlab DWF for PTC) is a useful and reliable plugin worth having when you need to quickly and easily import DWF files, projects and sessions inside Creo, then edit them. SimLab DWF Importer for PTC is an alternative of Simlab DWF for PTC which is no longer available for free. Simlab DWF for PTC is a plugin that enables you to import Autodesk DWF files (architecture models) created in PTC. It is capable of importing DWF files, which are usually uploaded in a DWF 1.0 format and are used to view 3D structures and models. SimLab DWF Importer for PTC Key features: SimLab DWF for PTC displays each imported DWF model as a separate navigation tree. The imported model contains elements which you can drag-and-drop into the Creo project window. The plugin also allows you to edit the imported model directly. You can use the Autodesk DWF Viewer for this. Creo is automatically synchronized with the Autodesk DWF Viewer. Thus, every model in the DWF viewer is shown in the Creo project window. - Import DWF files (models or projects) into Creo. - Edit and synchronize models. - View models in the Autodesk DWF Viewer. - Export models and their files in various formats. - Add comments on imported models. - Export models as DWF, BIM, AutoCAD DWF, or DWF preview. - Import models from Autodesk DWF Viewer as the plugin is synchronized with it. SimLab DWF Importer for PTC Installation Before you start installing SimLab DWF Importer for PTC, go to this page and download the plugin archive from here. After installing, SimLab DWF Importer for PTC you should notice a new ribbon menu on your screen, from where you can import your models and assemblies. SimLab DWF Importer for PTC Installation Guide Go to 'Workbench > Plug-in List' You will see a list of your installed plug-ins, SimLab DWF Importer for PTC. From here, select 'Simlab DWF Importer for PTC'. Click on the installed button and click on the 'Link'

System Requirements For SimLab DWF Importer For PTC:

Minimum: OS: Windows 7 / 8 / 10 Processor: Core i3 / Core i5 / Core i7 Memory: 4 GB Graphics: NVIDIA GeForce GTX 460 (1 GB) / ATI Radeon HD 5750 (512 MB) / Intel HD 4000 Recommended: Memory: 8 GB Graphics: NVIDIA GeForce GTX 460 (1 GB) / ATI Radeon HD 5750 (
