Wine is a free software emulator that offers a way to run Windows programs under Linux. Wine is an acronym for WINE Is Not an Emulator, and the program allows you to run DOS, Windows 3.1, Windows 95/98/Me, Windows NT, Windows 2000, Windows XP, and Windows Vista programs on Linux. Wine is able to handle Windows programs such as Internet Explorer, Outlook Express, MSN Messenger, and Windows Media Player among others, although there is no support for Microsoft Office or Visual Basic. Features: Wine can handle Windows programs such as Internet Explorer, Outlook Express, MSN Messenger, and Windows Media Player among others, although there is no support for Microsoft Office or Visual Basic. It is capable of running large software such as Photoshop and Publisher, as well as more simple applications like PaintShop Pro. The application runs only on Linux-based operating systems. Wine provides 64-bit compatibility for Windows programs running in 32-bit environments. Wine supports most DirectX 9 and OpenGL 1.2 features, and also most Sound Blaster, Turtle Beach, Ensoniq, and Creative Labs hardware. Some sound drivers are limited to Windows Vista or later. Wine is the only open source software emulator that supports Vista in full mode. One of the major advantages of Wine is that it supports Windows programs on a low resource computer, without the need to upgrade the entire operating system.
