2D editing of user-defined objects Geometry properties and data are preserved when moving, copying, and pasting objects Includes point, polyline, polygon, text, tables, and dynamic lists. Can display several views of a drawing simultaneously in a layout Supports all the standard AutoCAD commands for drawing, placement, and edit. The AutoCAD user interface is designed around a "workspace", which is the drawing that the user can see. The user interface consists of a menu bar, a drawing canvas, and toolbars. A model space is provided above the drawing canvas that the user can use to see and move other parts of the drawing. AutoCAD uses a menu bar at the top of the interface to access the various commands and options in the AutoCAD program. In addition to the standard menus and commands, there are also command-line-based menus and commands that are activated by pressing a hotkey or by an icon displayed in the interface. The drawing canvas is the area in the center of the AutoCAD interface that contains the current drawing. The menu bar, toolbars, model space, and drawing canvas are all drawn or painted in the background of the interface as a layer-style drawing in one of AutoCAD's standard color schemes. The drawing canvas consists of two distinct areas, the contents area and the user interface area. The contents area contains the current drawing in model space, and the user interface area contains all the elements of the interface (menu bar, toolbars, etc.) The user interface consists of two components. The menu bar is the top portion of the drawing canvas, which contains the main command and option menus that the user can access by clicking on the icons in the menu bar. The bottom portion of the drawing canvas is a toolbar, which is the space between the menu bar and the contents area. The toolbars contain the commands and options that the user can access by selecting the icons in the toolbars. The toolbars also display, or become active, when the user activates a command or option by selecting an icon in the menu bar. Users who do not have AutoCAD on their computers can view the drawing canvas, but cannot edit the drawing. A similar interface is also available for users of AutoCAD LT. Mobile app AutoCAD 360 Mobile and AutoCAD Mobile for Android were released in April 2015, and were released in September 2015 for iOS and Windows ca3bfb1094

This morning at a high-profile meeting between Illinois Gov. Bruce Rauner and President Trump at the White House, the two governors reportedly disagreed about whether a new state spending cap could be added to a forthcoming Republican tax plan. According to a source at the meeting, Rauner, citing legislative limits on tax cuts, rejected adding the cap, saying, "This is where we're at." A source familiar with the meeting told TPM that Rauner ultimately "bent" on the cap, but a spokesperson for the governor told TPM it wasn't accurate to say the governor did so, and said Rauner didn't advocate for or against adding the cap. The comments from the meeting, which the source described to TPM as "very contentious" and "contentious," came just a few hours after Rauner's proposed budget was unveiled. The budget, which is part of the campaign for a ballot initiative to overturn a law that caps the state's income tax at 3.4 percent, does not include any new spending caps. Rauner called the tax cap a "job-killing burden," and said in a statement he would "be glad to repeal it" if voters approve a constitutional amendment. A longtime leader of the conservative-leaning Illinois Chamber of Commerce, Rauner served as Illinois' top education official for nearly eight years before he was elected governor in 2014. He's been a key Trump ally in Illinois, and said on Friday he'd support funding schools with money from the Rainy Day Fund and other resources if the state's legislature allows the tax cap to be overturned. "We have to pass the budget," Rauner told reporters at the announcement of the budget. "And we have to make sure we have more money for schools." The Illinois State Board of Education, an independent agency that oversees the state's schools, also favors extending the cap. And while

System Requirements:

I added up all of the requirements and added in 5% buffer for any unexpected issues. If you have more than 2GB of RAM, then you can use more than 4GB. I am not sure if using 8GB is more than enough RAM or not. Maybe it will even run smoother with less than 8GB. I used the following for testing and the below requirements were what I used. CPU: 2.0Ghz Processor (Core 2 Duo, Intel Q9400) Memory: 2GB RAM (The highest I have tried for all
