13.03.2014 Version 1.0 of the AEC Plugin I started this project because I saw many Autocad applications that need a better support for the AEC (Architectural Engineering and Construction). I didn't find any free plugins that worked with my Autocad setup. If you find one that I missed, or if there's a way to make my plugin better, let me know, and I'll update the plugin.

**AecPlugin.dll:** This is the plugin you need to extract autocad files.

1. Unzip the.zip file.
2. Put the AutocadExtractorPlugin.dll file in the plugin folder (next to the AutocadExtractorPlugin.dll file).

**AecPlugin.chm:** This is a help file for users.

1. Place the file somewhere you can access it easily (best: desktop).
2. Open it

with a notepad and edit it. 3. Move the plugin folder inside the AutocadExtractorPlugin folder to make sure there are no spaces in the path. KooFit.dll: 1. Unzip the.zip file. 2. Put the KooFit.dll file inside the plugins folder. Help, Credits, Bug Reports & Questions Thanks for all the feedback, ideas and bug reports. I appreciate all your suggestions. You can find the credits of the sources that I used in the plugin in the Readme.txt file.
