Since its introduction, AutoCAD has been expanded and improved to take advantage of advances in microprocessor and graphics technology. In 2013, Autodesk released AutoCAD 2014, the first new release of AutoCAD since 2005, and the last major release before version 2020 was launched in late 2017. In 2014, Autodesk introduced the subscription model for AutoCAD in conjunction with other products including its AutoCAD LT software, and the first generation of AutoCAD 360. In this article, I will list the features of AutoCAD 2020 and describe how they have changed from the last version. AutoCAD 2020 has been available for a few weeks, and so far it seems that the 2020 version is very stable and feature complete. There are many new features in the 2020 version, and I will describe those, including several significant enhancements over the previous version. AutoCAD's 2020 Release Notes page lists the many enhancements in the 2020 version of AutoCAD. This page is just an overview of AutoCAD 2020. For a comprehensive list of the new features in the 2020 version, please refer to the Autodesk 2020 Release Notes 2020 Features The 2020 AutoCAD version introduces several new features, many of which have been available for a while in AutoCAD LT and AutoCAD Architect, although not necessarily together.
