What's new:

I've been working on a Guide's a little tool to help you guys make your own RPG Maker MV Characters. Let me know if you like the idea, see some of the assets I've made below here. Other than that I have new assets regarding character design for Battle Backgrounds and health bars that have come in fairly fast for all of you. I'm sure a bunch of you weren't satisfied with the last Battle Background, but I'm starting to tweak the work and make it more fitting for this RPG Maker MV Style. They will be available for download soon, will have some additional sounds as well. Also from somewhere down the road, I might roll out some new tools to help mold your own characters, I'll see if I can get them in shape. Also in the ground working on some Items in RPG Maker MV to suit your enemies, stronger versions of say swords, maybe a few different tools that will be perfect for your Dragons. Now since you all know some of the Main Resources of RPG Maker MV these will probably come faster than the normal images. Here are the new assets: RPG Maker MV Prisoner Battle Background - Ready to Try, and the new set of 14 sounds for Characters in Today's Post. I'm also going to be working on making it so you don't have to USE/LESS EVERYTIME YOU GO FOR A DIFFERENT OUTFIT. When you close your favorites when you want to go into your character editor and they still open up. Hi tyler, nice work, i like the way you did it with the MMV, the new prisonbg looks nice! i did have a question, will you make a female version? About the sounds you made for Battle BG, ill be making use of them cause im creating a new game for my own little testing of the game, but its now to late to get them back in as shes a lvl 32 now. Not sure how long the sounds will be kept, on my PC it would take a bit of a day to make a ready and hope to get back to the previous sounds but that or I might just leave them as they are.Q: Another example of reversible circuit with current gain less than one I want to find a reversible circuit with current gain less than one. I have $\frac{\alpha}{\beta}$
