PURCHASE CER-CERV. BAC. prostate cancer. He has done all of this in the past 10 years since the age of 6. By the age of 8 he had succeeded with three surgeries to restore urinary function and is still undergoing treatment. The family said doctors told them he could choose a career in medicine or in a food-related profession and he chose the latter. The Daily Breeze reported that as the boy was returning from a science fair, he said he was impressed with the cone of ice cream someone had left in his family's driveway. He said he began licking the ice cream and it got bigger and bigger until it was a cone and he developed an interest in science. He decided to try making his own ice cream cone. As for the pain, he said his best guess is that the cone of ice cream had embedded a tight splinter into his esophagus, the Daily Breeze reported. He said that while the pain was at its worst at the beginning of July, the discomfort has eased a bit. He wants to prove that nobody should be judged for helping others, and said he wants to help families with special needs children who suffer through the same procedure he underwent. Sore spot stories Donâ€™t try this at home. Or especially if youâ€™ve eaten ice cream in the last six hours, because your esophagus could be perforated. Thatâ€™s because ice cream is a good conductor of heat and pressure. So ingesting it may trigger a dangerous reaction that has nothing to do with dental cavities, cavities or tooth abscesses. (A cavity in the tooth is different than a cavity around the tooth.) When ice cream gets stuck in an esophagus, it can cause the lining of the throat to crack, or it can perforate the esophagus and cause infection, said Peter Snyder, M.D., of the UCLAâ€™s Southern California Permanente Medical Group. â€œAt this point, the pain is e79caf774b
