GLOWCOMA: Chapter 1

Seedling is a simple game of resource management and strategy. In a procedurally generated world with randomly generated maps, you must harvest the resources you need, use them to craft structures and build defences, and

then fight other players for the right to call yourself Master. Key Features: • Procedurally generated maps with randomly placed resources • A variety of game modes • 24 unique ships to build • Randomly generated levels • Manual and adaptive difficulty settings What's New: • New ships added, including the Locust, the Tamborine, the Warthog and the Zepplin • Totally re-designed ship parts mechanics, give you more control over the ship you're building • New uses for some of the old ship parts • And more! That's it, that's all we want to say. We encourage feedback, suggestions, and every kind of feedback. This is the pre-alpha, that means lots and lots of bugs, and some things might be missing. We are open to all suggestions, and we'll consider nearly all of them. If you want to get in touch with us, here is the Facebook page and our Discord. What's new:

2 Hi all! We have been hard at work on the upcoming beta test and we have reason to share in the form of a scenario running on Vanilla. The scenario is called Battle of Tong Gate by long-time community contributor, Wix0rt, and only gave us the *wink

wink* hint of it on the RWBY Season 4 Art Party countdown video a few months back! There is *eye roll* grating evidence going into battle already starting for the scenario, the map alone is a bit aeyyy! There is a lot of backstory, details and concept, design and polish work going into this upcoming scenario so we just wanted to share it with you all early and set expectations for what you can expect from that. This scenario is designed for Chapter 19 players but is playable on the full version as well. Any differences mentioned in here will make its way into full version. Much of the content will involve story, visuals and general polish so there is a fair bit of upwork on it. To not ruin anything we'll keep it vague until closer to the beta test. *wink* We are starting by showing some examples of the environments to help get a good feel for the map. If everything unfolds, it's nice to have a preview of what we'll be battling a team through so we are going to play through those two with an early outline of what will be occurring in the scenario. Grasslands City is the starting point for scenarios like this, meaning you will open into the map in a large area that will further expand from there based on its location, structure and beauty. Let's see the 2 areas that we'll get a glimpse of today. Map area 1: Grasslands City (Start and End) Here is a preview of the first map area. The map is scaled on the large version for reference purposes, but don't let it fool you. This area is 7 times the size of the other area we'll be seeing today. The map has large populated zones accessible by multiple pathways which provide direct access to facilities and then also wide open spaces that can be utilized to drive up distance and fire range. There are multiple large structures dotted throughout the map area which provide lots of size, varied sub-areas and plenty of cover. This start map area presents us with a couple
