The Count of Monster Disco is a hot-blooded guy who wants to develop his business in no time. However, he's not a man to spend money recklessly. He wants to cut costs at all times, including on the cost of Halloween decoration. But he's never been too particular about Halloween. Why? Well, he's always had friends to invite to his Halloween parties. And, they've never disappointed. The Count of Monster Disco has plans to improve his business by expanding to new fields with new friends to invite this year. But, he has no idea that a mysterious stranger has entered his business. The stranger is in charge of the supply wagon, which he uses to transport supplies to his mansion. He's also ordered the train from Frankie, a monster driver. The train is run by Frankie's huge, creepy head. At night, Frankie can be locked up and replaced by another, even more creepy head. But, the train can also be used as a battle vehicle in the game's story mode. The train has a huge arsenal of weapons and equipment at your disposal, including a paintball cannon and a smoke machine. As the Count of Monster Disco, you have to guide Frankie to the mansion and collect as many snacks as possible for your Halloween guests. At the mansion, you'll have to entertain the guests, and the only way to do this is by giving them snacks. If they don't get a snack, they get fatter and fatter! Also, you'll get control of the decorations too, so you'll need to decorate the mansion, and hide them. In the Trainsylvania Mansion, you'll have to manage the supplies and then unlock all the houses' doors. Once everything is set up, you'll host the Halloween party and give out snacks to your guests. Afterwards, you'll escort the guests back to the supply wagon, which is waiting for them at the station. When everything's done, there's one final task. You'll have to escort the guests back to their homes. You'll have to bring everything to the Mansion. But, don't forget your vampire-like guests! If they get stranded on the roads, they'll get scared. And, if they're scared, they'll show it. They'll

I have a type defined like this: @Basic(factory = true) @NoArgsConstructor @EqualsAndHashCode(callSuper = true) @ToString(callSuper = true, toStringStyle = ToStringStyle.NONE) public class ApprenticeshipLevel extends BaseObject { // some fields } This works fine until I try and call the toString() method on a List. What happens is I get a ClassCastException. This is because in ApprenticeshipLevel class has the @ToString annotation and the ApprenticeshipLevel class is used by a different project, so there is no way of casting a List to a List. I can get around this by overriding the toString() method, but I don't like this solution. So, what I have in mind now is creating a class called ApprenticeshipLevelHelper that looks like this: public class ApprenticeshipLevelHelper { @Override public String toString() {

is an action game for the Game Boy developed by SETA Co., Ltd. and published by Konami Corporation in 1998. It was only released in Japan. After its release, Psycho Starship Rampage was remade into a shooting game for the DS, titled Psycho Tactical Assault. Gameplay Psycho Starship Rampage is a 2D sidescrolling action game. The player controls a bouncing space fighter and must avoid hits from a variety of enemies. Special attacks are performed by piloting upwards and firing laser beams from the bottom of the screen. The player is always automatically propelled back down when hit and there is no true death in this game. When the player maneuvers perfectly with the fighter and hits the correct enemies, it will grant the player a special power-up. It may only contain a weapon upgrade (such as increasing damage), an extra life and/or a zoom attack (such as increasing the size of the fighter or projectiles shot by that weapon). After using a special attack, the player will receive a score bonus based on how well they performed. Note that the version for the Game Boy Advance also contains some new types of special attacks. Reception Psycho Starship Rampage received mostly favorable reviews. Fido.fr praised the game's replay value, while GameSpot praised the

game's fast-paced gameplay. IGN also commended its fast-paced gameplay that results in "great battles", as well as its excellent controls. GamePro likewise praised its fantastic gameplay. Game Informer, however, criticized the controls, calling them "poor" and "nonsensical". GameSpot, citing this along with its slow-paced gameplay, the fact it was difficult to complete, and the large load time, rated the game with a 5.6/10. Game Revolution however did give the game a B, stating "Psycho Starship Rampage is surprisingly easy to master" and praising the game's action, graphics, and overall music. GameSpot also gave the DS version of the game a 4.5/10, commenting that "Psycho Tactical Assault lacks the charm of its Game Boy pastiche cousin", and criticizing the loading times, and the game's performance. The remake, in its case for the DS, received a 7.2/10 from IGN, whom praised it "vastly improved over the Game Boy original", while also criticizing its "massive loading times" and "bad geometry".
