What do you mean, the loot system is unbalanced? Do you want some better loot, then I would do you a favor and stay out of the skill tree. Lazy b#tards. No, you cannot follow the hero into town. They'll end up with a bunch of dead villagers and will need to do everything by themselves. You will never find any loot there, so there's no point in going. Oh, that's right. What kind of a hillbilly are you that you don't carry water or medical supplies? *steals med kit from female goat and administers first aid* No, that's fine. I didn't mean to insult you, I was simply stating how the game should be played. Honestly, I had no idea a "dwarf" would be so self-deprecating and like, so desperate for validation. You know what's great about those old survival sims like this? All the heists. I love stealing stuff. I love taking what little I can from the NPCs that are all up in my grill while I hide and steal from them. It's the best part of the game. Well, you probably should leave then because no one's stopping you. I'm sure you'll find something to do on your own. Don't worry, I have plenty of entertainment for you. When the settlement here is complete, I'll even show you some better loot. And so it begins... Well, that's not possible... *rearranges all furniture in the cabin, then sits down* So... what do you say? Is this enough loot for you? If not, you can do whatever you want. This game is really great. It remind me of Zombie donkey Simulator (didn't check the link tho) You can walk up to an NPC and stab them, I think. Actually, it's just great, definitely worth 10/10. Haha it's great that you want to stab people. Try it. You'll have fun, guaranteed. You know you can stab anything in the game though. You can even get ammo from huts. You're the guy

WOMEN'S MARCH! Friday, April 06, 2007 Yohji Yamamoto, Michael Kors and Rossouw January 2000 What are the highest accolades Designer Yohji Yamamoto can aspire to get? I mean, besides getting gaygas when his entire team is gunning for the Gitane awards. As the popularity of Kenta has grown in this country, so has the fan worship of Yamamoto. Fashionistas are forever envious of his rapid rise, and fans all across the globe long for the chance to buy his designs. But a storm is brewing. His output today is as close to constant as possible as he is continually at work for as long as twelve or fourteen hours a day. His global schedule is as busy as it is exhausting, and he still attempts to give his best. This, needless to say, goes beyond his field of fashion and into other realms. This is a capricious, ravenous beast. Extremely superstitious regarding his work, Yamamoto is precise and disciplined in all things, despite his hyper-active state. He continues to be inspired and moved by the work of native Japanese artists. Tomorrow, Yamamoto will open in New York at the McMillion Kaufmann Gallery for the exhibition entitled Too Cool for the Airport. The exhibition will consist of specially selected pieces from Yamamoto's recent show in Paris and Japan, as well as various sketches and studies, photographs and paintings. YAMAMOTO: "I don't do things half-heartedly. Either I like something or I don't. I don't search for things that I don't like. I like the rebellious side of objectivity. I like clothes that force me to think that I can change my mind." No matter how bizarre or untraditional his designs are, there is always a rationale, even an intelligent rationale, behind them. The name Yohji Yamamoto is a metonym for the revolution that started in 1968. The world has moved on since then. But Yamamoto's ideas have changed, too. He was compelled and controlled by the concepts that his work spawned. Today, he is the best designer on the planet. Yohji Yamamoto is a dandy and a genius, perhaps the most brilliantly talented of his generation. He attacks style with a soaring vengeance, beginning with the very basics. The imperious cheekbones of his work are a striking feature, akin to Chumei'sdynamic moods
