- "Sleeping" on the control panel costs you a turn - Collect all 5 amulets and win! *****Tips***** If you like this game, you can rate it! Hey guys, finally got my drivers license and got my car, and I wanna show you guys how good it is. Sure it has no doors or seatbelts, but its better than the crappy car youre driving right now, and yes it is defenseless, but hey did I mention its defenseless, so play at your own risk! and If you want to comment you can do that on YouTube This is a mini bonus video I did for my favorite car game. There are tons of different car games, and I was bored so I made this one for you. The graphics are simple but good enough for you. I'm gonna do the rest of the game very soon! ROBLOX Just got some great back up jobs for Christmas. The best is working for "ChristmasTucker", he is some one from Canada, you have to build a high way thru a tiny dar!!!! It sounds hard but it is not, the route you have to follow will make it a breeze... My second job is with "Jellytron" he lives in Long Island, NY. He is a kind person who takes great care of his friends. He is asking you to build him a house. It should be easy, but it will take a little while, and getting the right materials may take awhile. If you dont want to do this job, that is OK. Let me get this straight. I have invested \$100 of my digital currency to get one of these starships, the best one you can build. I say so, not because I am a pimp, but because a single starfighter is worth more than a single kevlar vest. A single laptop, or an iPhone is worth more than the ship, why? Well, because you can walk down the street and buy the equivalent of several ships. I have put \$100 worth of money into the game, you have none. You want your money back. But it isn't your money, it is mine. so here you go,

Thursday, November 27, 2007 Stick Up is a stealth game that is much more forgiving than many other action games. It was originally a freeware game, and now for sale on game site and from the Stick Em Up Steam alpha at the Halfway Point and at my own website. The price is pretty good for a game that is indie and is pretty accessible, but how can it really compete with games that cost hundreds of dollars and lots of time to develop? I will attempt to sort out that question. The storyline of Stick Up is complex, but not particularly convoluted. While you are given all the information in the Alpha version, you have to unpack all the information that you are given. You are forced to look at the information from different angles to form a better understanding of your situation. You are forced to try to come up with your own ideas and figures based on what is given to you in the beginning of the game. The context of the game is that a terrorist named Joey Pollan has been assigned by the terrorist underground to commit an act of mass murder to send a message to the government that they were not willing to go down without a fight. If the leader of the terrorist underground got away, he would then unleash the secrets of the underground, which would mean a revolution against the government and end in war and death for tens of millions. If the government succeeded in killing Joey Pollan, they could not only save themselves from a revolution, they could finally get the resources they need to fight back against the terrorist underground and keep a nation safe from terrorism. Joey Pollan is a world renowned scientist who has worked in the government sponsored fields of chemistry and biological weapons. Most of his career was spent preparing to use massive weapons of mass destruction on an epic scale. In the end he was required to work for the government, but for reasons not revealed in the Alpha, he was forced to work for the terrorists underground. Thus the government gets a first hand demonstration of Joey Pollan's amazing chemical weapons, which would make the government go to war with the terrorist underground. The leaders of the underground wanted to reverse Joey's role. They thought that by making the weapons they created here, they can live

in their own paradise and rule the world. They do not know that, like in The Matrix, their scientists were creating living weapons that, if Joey released them, would enslave the world. He was the demon that was never supposed to have been unleashed.
