What's new:

The Vitatio 3 has been redesigned with a huge 720cc engine, making it one of the most powerful models in the range. Its twin-cam four-stroke engine is fuelled by premium unleaded petrol, for a cleaner output. PROS: Full range of standard and optional features; reliable and robust engine; good ride and handling even with high-handling tyres; designed to achieve the best possible mileage. CONS: Hybrid EFi Technology only available as an upgrade; range of small issues with the current model; cramped cabin; sacrifices some of the comfort and safety features. VERDICT: The V-series Vitatio is an impressive offering from Honda. It does everything well, if not perfectly, making it the perfect package for urban riding. The biggest issue is that it's expensive. Mercedes S400 BS 4 The newest edition to the Mercedes Benz compact car range; the new BS4 model is a stylish, spacious hatchback which merges good looks, independent suspension, and a DVD coupled back

system to form a terrific all-rounder. **PROS:** Good driving dynamics; comfort and safety systems make it an almost perfect package; clever interior space; versatile dimensions make it ideal for a variety of uses; a high level of standard equipment ensures good practicality. **CONS:** Only logical; poor, cheap-looking dashboard; three seat belts only for adults over 115cm; limited safety systems; no emphasis on economy or practicality, just on style. **VERDICT:** The pretty and practical S400 looks lovely, but it often proves to be a disappointment. The interior takes your money, but you can change that by choosing a more opulent option, or just investing in a range of high-end accessories. **BMW i3** The 'i' stands for 'intelligent' and 'i' generations are highly connected, eco-friendly and intelligent vehicles. Game features: Progression System: Characters in the world of TTRPG are between 6-20 years of age, and have levels ranging from 1-9. Levels are granted every time a character completes a quest, and range from 1 to 9. The higher the level, the more possibilities are in the further levels are. This is an example of a character progression: is the level of the character is the point the character gains by completing a quest is the bonus gained by gaining levels To sum up, level is the multiplier of the amount you gain in your next quest. Items in the world of TTRPG are usually discovered while exploring the world. Then, they are kept and upgraded using resources that will be provided for free as you play. There are three main material resources in the game: - Experience is gained by completing

quests. - Loot is gained while exploring the world. - Crafting is gained by completing crafting quests. Loot is gathered around the cities. Then, it is stored by the characters. Experience gained on completing quests is used to increase the level of each character, which is required to progress in the game. There is a multiplier for each resource. If you have more than one resource, then the effect will be multiplied. The experience multiplier is increased by gaining levels, and decreased by lowering the level of a character. Crafting is done by combining resources: Experience Sensitivity is the level of each item. The sensitivity of a level 1 item can be up to a level 10, the sensitivity of a level 10 item can be up to a level 100, and the sensitivity of a level 100 item can be a level 200. The chance of obtaining an item at a higher sensitivity level increases exponentially with the level of a crafting resource. For example: 1 material costs (4,000)
