I would like to sort the data by the Value column, but for the index of the column to be the reference of the sort. At the moment, the data is sorted by the Value column, but the index of the column is not the index of the sort. Instead, it sorts the rows from the lowest

Value to the highest Value. I would like the rows to be sorted by the Value column, but for the index to be the index of the sort. Here is what I want. Example Data df = pd.DataFrame([[1, 'hello'], [2, 'there'], [1, 'hello2'], [4, 'here'], [7, 'hello']], columns=['ID', 'Value']) ID Value 0 1 hello 1 2 there 2 1 hello2 3 4 here 4 7 hello What I currently have A: Using lambda
