P&P Drawings and P&P Templates are used to create drawings. This feature enables user to create and manage drawing templates. The user can also create a new drawing from scratch or use an existing drawing template. The company also offers an online learning website for products such as AutoCAD, Adobe Illustrator, InDesign and Powerpoint. It is called Autodesk University and is accessible from any computer or mobile device. It also has several training modules and courses online and offline. They have about 25 000 live instructors from around the world teaching more than 2000 courses a month. 2016 Q2 release of AutoCAD was announced on 14 January 2016. The focus is on accessibility and mobility, improving user interfaces and experiences, performance and speed. AI, for example, is helping to automate creating more complex documents, such as building blueprints. On 6 March 2016, Autodesk announced the release of the next generation of AutoCAD and AutoCAD LT to be available in both Mac and Windows. The software is designed to have fewer complexities and a simpler and more intuitive user interface. Autodesk has also begun to offer collaborative design in AutoCAD. In 2014, it introduced Multiuser feature which allows multiple users to work on the same drawing at the same time, compare designs and approve or reject each other's changes. In 2016, it introduced the Collaborative View to allow a large number of users to collaborate on drawings together on a computer network. Design AutoCAD offers three basic ways to draw (create) objects in a drawing: B-rep modeling—creates a solid model of the object Section modeling—creates a model that is cut by a plane and is constructed of connected 2D sections Wireframe—creates a model that is composed of line segments The drawing process takes place in two major steps: the insertion of entities into the drawing and the manipulation of entities. The user inserts entities such as lines, arcs, circles, arcs, arcs, holes, lines, text, dimensions, multileaders, table of contents, and layers. Each entity has specific properties such as number of points, color, line weight, shape type, etc. Entity editing is the process of changing these properties. The user moves entities, rotates, resizes and scales them, and manipulates their properties. An example of an entity is a line, which can be drawn from the drawing area, moved ca3fb1094

The company will open its first three shops in the Indian market, a media report says. The three restaurants will open in Hyderabad, Bangalore and Delhi. The firm, headquartered in Canton, Mass., opened its first restaurant in 1991 in Quincy, Mass., and since then, it has expanded to more than 6,800 shops across all 50 U.S. states. The company has plans to open around 350 more outlets in 2016. "Indian consumers are more discerning, demanding and sophisticated in their taste than ever before," said a Dunkin' Donuts executive quoted in the report. According to the report, India is the world's fastest growing coffee market, growing at nearly 25% every year, with a total coffee market value of \$23.2 billion. "It's a huge market which is showing very significant growth. India is the world's fastest growing coffee market, growing at nearly 25% every year, with a total coffee market value of \$23.2 billion."Supreme Court justices will hear oral arguments Tuesday in a major California gun-control case. A New Jersey resident challenged the constitutionality of California's ban on high-capacity ammunition magazines, arguing the Second Amendment, the constitutional guarantee of the right to keep and bear arms, gives him the right to possess such magazines. The San Diego-based 9th U.S. Circuit Court of Appeals, which heard oral arguments in March, said California's ban on such magazines violates the Second Amendment. "The Second Amendment, as originally understood, protects only those arms and ammunition not in use by the military or the national government, or those arms and ammunition
