Face validity in sports sims is a difficult goal to reach. You have to get the feel of the game right, not only in terms of controls and motions, but also in terms of gameplay, goals and challenges, in order to feel like you're actually playing football. Face validity is why we continue to rate Fifa in the top five in our rating system. In my opinion, the most significant feature of this year's iteration of the series is the use of HyperMotion Technology, or HMT for short. This is a new way to simulate the position of player-to-player actions by leveraging the real-life player data that EA Sports has gathered from a number of high-intensity football matches in a motion capture suit. It's really refreshing to have this feature as it gives more feelings of realism and brings the game to life a lot more than last year's version did. For instance, when playing away, the opponent team's players naturally move around and move as if they have real-life counterparts. The result is that the whole stadium feels like it's being played in, rather than a virtual stadium. In addition to the new way of simulating players' movements, this year's version also introduces intelligent AI opponents. Throughout a game, AI opponents will perform different actions based on their individual strengths or tactics. This includes making an extra player for you, directing the ball towards a certain area on the field, or even making a challenge for you. While new generation consoles' FIFAs have always received a fair bit of criticism for being too unrealistic in terms of gameplay, once again this year EA Sports has taken steps to ensure the game remains true to the original games in terms of feel and presentation. A host of improvements have been made, including the addition of new features such as AI technical players, laser shots, and more. The team then took to the field for a live demo at E3 2016 to demonstrate some of these features. Watch the video below to see exactly how the new features work in the new FIFA, as well as how they feel in practice. Good. This is a very pleasant surprise, as I would have thought an improvement such as this wouldn't be possible on the Xbox 360, especially as that platform has been plagued by a number of issues over the last few years. Having now played the game and seen the new features in action, I'm starting to

Fifa 22 Features Key:

- Live your dream in Career Mode, where your gameplay comes to life with 22 licensed, real-life professionals.
- Career Mode gives you more ways to advance to the ranks.
- Live out your Ultimate Team dream with 20+ new player attributes, 15+ player kits, and 8+ new mouthpieces.
