Epicia is a fantasy world with magic, castles, dragons, creatures, and corrupted kings. The game's player is a king of one of those kingdoms. The overall goal of the game is to conquer your enemy's castle. Every new faction has access to lesser, more cost-effective resource gathering bonuses, and thus their armies have higher starting strength. It's possible to attack another kingdom and merge into it, or attack another faction and get 100% of resources. It's also possible to attack enemies corrupted by sleeping dragons, which makes them much stronger, but they will be aroused and start attacking any kingdom if you do this. All kingdoms have 16 possible alliances. [EN] Press content from the game is presented in English language. [FR] Press content from the game is presented in French language. [DE] Press content from the game is presented in German language. How to install: In your character's kingdom go to "My kingdom" and press "Create [Player's Name]". In the NEW MENU press "Options" and then "Packages". Press "Add external". Find "Epicia" and press "Install". When the installation is done, go back to options and press "Start". Uninstall the game Open your game directory. Extract the archive to this directory. Delete the Epicia folder. You can now start the game. How to play: Main menu of the game: Select "Play". Select "Control" and use the left or right arrow keys to navigate and the up and down arrow keys to change the camera view. Press "PLAY" to play. Gameplay: Select a kingdom and you can see a map. Press "C" to change camera. Press the right arrow to move. Press the spacebar to pause the game. Press "L" to lock camera view. Press "E" to bring up inventory where you can change your options, craft and fight. Press "D" to drop the game. Press "S" to select sleep mode. Press "Q" to quit. Notes: All creatures, creatures injured, states of health bars will be translated automatically from French. All screenshots and videos are from a French translation. Any feedback is appreciated.
