## 'z Toolkit V3 Boot Disk 58

---

.This invention relates to a disposable absorbent article having both shared and distinct advantages. Disposable absorbent articles such as diapers, training pants and adult incontinence articles are well known in the art. Such articles have been designed to provide a close, comfortable fit to the wearer and to contain unacceptably high amounts of urine, feces, and other bodily exudates. Disposable diapers have come in various configurations to meet the needs of wearers for different physical characteristics. For example, disposable diapers have come in both dual-snap configurations and in three-snap configurations. Disposable diapers have also been provided with elasticized leg openings, as well as elasticized openings through the side walls of the diaper to limit the amount of bodily exudates leaking from the diaper. In certain configurations, the topsheet of the disposable absorbent article will be an absorbent, fluid pervious layer. One such topsheet configuration is the laminated topsheet of U.S. Pat. No. 4,782,835. It would be beneficial to improve fit characteristics and increase wearability of disposable absorbent articles, such as those of the type shown in the '835 patent. In U.S. Pat. No. 5,817,108, a disposable absorbent article is disclosed having a topsheet, a backsheet and an absorbent core. The disposable absorbent article has a portion at least partially composed of a stretchable or elastomeric material that is a knit fabric with elastic strands in portions. It would be beneficial to provide a disposable absorbent article having improved fit, improved wearer comfort and reduced leakage of bodily exudates. We believe that a disposable absorbent article which provides improved comfort for the wearer, improved fit characteristics and reduced leakage of bodily exudates would be a useful advancement in the art. The present

---

invention relates to a disposable absorbent article having a topsheet composed of a plurality of warp yarns and a plurality of fill yarns. The topsheet can be composed of multiple plies of the warp and fill yarns. Typically, the disposable absorbent article includes an absorbent core disposed between the topsheet and a backsheet. The disposable absorbent article can be a diaper, a training pant or an incontinence undergarment. In one aspect, the

According to Lt. David Cook of the Springville Police Department, a man and a woman in a maroon car parked at the sacred grove and then fled with the other occupants of the car. The couple stole a duffel bag belonging to one of the occupants and drove off. The sacred grove is located across from Springville High School, near where U.S. Highway 99E crosses over the Union Pacific right of way. It was reported to have been vandalized twice before, Cook said. "Sacred groves are very sacred to Native Americans," he said. "It's a very rare occurrence for a sacred grove to be damaged." For the past several years, local Native American groups have been working to protect the sacred groves of south Davis County. "This is a case where some people took it upon themselves to do what they thought was right," Cook said. "We encourage people to find out what their rights

---

are. If they feel they have a right to do something like this, they should do it.” The incident, which occurred around 8 p.m. on Wednesday, is one of several instances where arrests have been made by police in recent years. In 2017, three people were arrested for a similar crime. Unlimited Digital Access: Only \$0.99 For Your First Month Get full access to The Davis Enterprise content across all your devices. Police are hopeful that the recent arrests will deter other potential vandals from venturing onto the groves. “We’re proud of these arrests,” he said. “These people are taking upon
