Each organization can be thought of as a group of separate CAD components, each of which has different functions. AutoCAD organizes into four different organizations: 2D 3D Structural Numerical Note: Although AutoCAD 2019 was recently released, the majority of the information in this article is still valid for earlier versions. The organization structure has not changed since 2011. 2D The 2D organization is where most CAD users start with AutoCAD. The 2D organization is composed of four different tools: 2D Drafting - Create and edit 2D drawing components 2D Construction - Create 2D architectural components 2D Animator - Create animation components 2D Layout - Create 2D floor plans and models 2D Drafting Drafting components are the building blocks that make up the drawings in the 2D organization. The most common drafting tools are referred to as the standard drawing components. The standard drawing components include: Axes (or coordinate planes) - Show the current coordinates of a drawing's axes Axes (or coordinate planes) - Show the current coordinates of a drawing's axes Guides - Show the current coordinates of a line guide Guides - Show the current coordinates of a line guide Dimensions - Show the size of components or dimensioned drawings Dimensions - Show the size of components or dimensioned drawings Grid - Show the current coordinates of a grid Grid - Show the current coordinates of a grid Selection - Show the current coordinates of a current selection Drawing primitives - Create and edit drawing components Document - Open, close, and save drawings Favor
