Soundlib G-Player v2.0.1 (Macintosh).Q: New project template in Visual Studio 2010 beta 2 Is there any new project template in Visual Studio 2010 beta 2 in Visual Studio 2010 Beta 2 I am not able to see any new templates that are not available in Visual Studio 2010 Beta 1. I have following project types. WPF, Windows Forms, C#, C# Wizard Apart from those, Does Visual Studio 2010 Beta 2 include any new templates? A: If you look under Add New Project you'll see a new Project Template called "Console Application - Visual C# with Web Service" listed there - you can select the second option from the tree structure shown to create a project that will add a WCF Service to your project. Teaching and general management in anesthesia. Anesthesia teaching and management will undergo sweeping changes during the next decade as the health care industry undergoes incredible changes. The author outlines the factors which are changing the teaching and management of anesthesia in the 1990s: information and computer technology in the workplace, the nation's expanding population, the nation's expanding economic activities, the decentralization of health care delivery and the impact of managed care. Attention is also paid to the "new" anesthesia department as it is being developed and further coalesced by the activities of the American Association of Anesthesia Personnel (A.A.A.P.).Diagnostic vs therapeutic bronchoscopy in children. The purpose of this study was to review the current literature on bronchoscopy in children to determine whether there is evidence to support a role for diagnostic bronchoscopy as an alternative to chest radiography in the evaluation of possible pulmonary exacerbations. A comprehensive search of the MEDLINE database, reference lists of articles obtained from the search, and a manual cross-check of pertinent journals was performed to identify articles published from 1965 to 1995. The inclusion criterion was a population of children. Studies were reviewed by three authors who judged the studies according to a standard protocol. A total of 35 studies met the inclusion criteria. These studies demonstrated that bronchoscopy
