Free Download eCFG Audio Player 1.4.3.Q: A vertical list on the right side of an image with caption I'm trying to find the best way to create a vertical list on the right side of an image. I want to list links in the format of 'one.com', 'two.com', etc., with a caption, 'Some Description'. I'm currently using HTML with images that are floated right, then I have an ul class on the left side of that image. Any suggestions on how to create this better? A: Have you looked at text-indent? You could take either a list or menu-like list and indent the descriptions, as they could just as easily be ordered lists. You can assign a class to either the image or the description (or both). You could then assign a float right to the image and text-indent to the description. (Note: I am not sure what you mean by a top level line.) Clevel 6d1f23a050
