After loading Install - extracontract. exe extension, the Click here to download LUXONIX v1.3.6-d33p57a7u5 : finally all is well and I hope it will work out. I will keep you posted. I play on Win 10 and all I get is a black screen after loading Install - extracontract. exe extension. The reasons for it is because you are running WINDOWS 7. As a result, all the installed plugins and database are incompatible and after loading a brand new game, it won't work. Hence you cannot play it. BLC is not compatible with Windows 7. I had the same problem but with Windows XP. The reason is that it installs a version of Luxonix similar to older versions of the game. You need a version of Luxonix, which is compatible with Windows XP. I also recommend installing Luxonix through it's CAB file instead of installing directly from an exe file. Here's the installation link I am not posting a direct link to download luxonix because I'm not sure if the link won't work. Download Luxonix through it's CAB file, copy the contents of the install folder and paste it in BLC's data folder. I hope this will help you out. I found another way to install Luxonix without patching. I downloaded the CAB file from Luxonix and then I created a folder in my BLC folder (even if the CAB file is in the other folder). Once I installed the CAB file, the install routine started. I installed it's corresponding version for Windows 7 from the first time and it worked fine. Let me know if it works for you. Thanks to Rocco, for checking the original version of Luxonix and for giving me the exe fix. I am glad I asked. Thanks . If this is the first time you are installing Luxonix, I suggest you first check if your computer is compatible with the game. Here's a link : I am sure that after installing the Luxonix, you should be able to play the c6a93da74d
